1. The first group of people who are interested in the study of the history of the world are the historians. They are the people who write the books that tell us about the past. They are the people who try to understand what happened in the past and why it happened. They are the people who try to find out what the world was like in the past and what it is like now. They are the people who try to tell us about the world and its history.
